# PREMIUM QUALITY

WITHOUT CHARGING A PREMIUM.

With our state-of-the-art fabrication technology and finishing process, our quality is second to none. In fact, we are the only company in our industry to have its products tested for strength and capacity by a world-leading testing and certification laboratory.

We offer premium, fully tested quality, and better yet, you'll never pay a premium. Our prices are always highly competitive. But that's just the beginning of the Worldwide Material Handling story. Read on.

## THE KNOWLEDGE AND INNOVATION OF AN INDUSTRY LEADER.

Our history as a company is grounded in broader material handling experience and perspective. That means we know what our distributors and their customers deal with every day, and that makes us more valuable as problem solvers and partners.

### **We're also an industry pioneer.**

Worldwide Material Handling was the first to offer wire mesh products from stock and today stocks more pallet rack accessories than anyone else in the world. We were the first to distribute our products from multiple warehouses strategically located across the United States. And we were the first producer to have its products tested by an independent laboratory.
