PALLET SAFETY STOP

STRONG FLUE SPACE DIVIDERS FOR FIRE SAFETY

WorldStop® Pallet Safety Stop

Keep your warehouse safe and in compliance with local fire codes with the WorldStop. Our WorldStop product keeps pallet rack flue spaces consistent and allows for perfect pallet placement every time. The WorldStop is the strongest, most cost-effective flue space solution that provides a fixed 6" (or more) flue space for industrial pallet rack applications.

FEATURES AND BENEFITS:

- › Controls pallet placement to keep flue space consistent
- › Designed to meet International Building Code 2012 (IBC 2012) and NFPA13 where applicable
- › Installs easily and securely with (4) prepunched and countersunk holes, Tek screws included
- › Stock sizes
 - 12" (6" flue)
 - 18" (12" flue)
 - 24" (18" flue)
- › Rigid box design and robotically welded for superior strength
- › Standard heavy-duty gray powder coat finish
- › Additional custom colors available
- › Custom designs and sizes available to fit every pallet rack application
- › Single row design available

- › Includes 4 prepunched holes per side for mounting versatility
- › Designed with a clearance slot on each side to securely fit around wire deck applications up to a 2 ga. wire diameter
- › Consistently keeps a fixed 6" (or more) distance between pallets
- › 5" high to prevent pallets from entering the flue space area
- › Single row pallet safety stop in stock
- › Flue space control for single row applications
- › Double walled and gusseted for superior strength
- › Integral offset rib for wire deck clearance
